

## Email Fraud Puts Businesses at Risk

Phishing, spear phishing and malware attacks are becoming more pervasive every day. It's a global problem, and a critical risk to businesses. All it takes is one compromise to destroy consumer trust in your brand.

91% of hacking attacks  
begins with  
phishing or spear-phishing email.

APWG received more than 700000 reports  
of unique phishing campaigns for the  
year till Q3 2018

75% of S&P 100 companies  
identify cybersecurity as a  
business risk.

All industries  
are being targeted  
with phishing attacks

### Targets

Financial Institutions

Cloud Storage /  
File Hosting Sites

Webmail and  
Online Services

eCommerce  
Sites

Payment  
Services

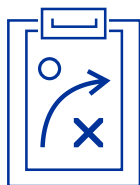

Manufacturers

ProDMARC stops domain spoofed phishing attacks by automating the process of DMARC email authentication. Thus, it helps you protect your customers and third parties from cyber attacks, maintain trust in your brand and improve digital communication

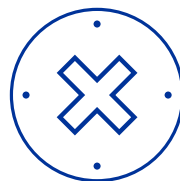

## HOW DMARC WORKS

### STEP1

Implement email  
authentication standards

### STEP2

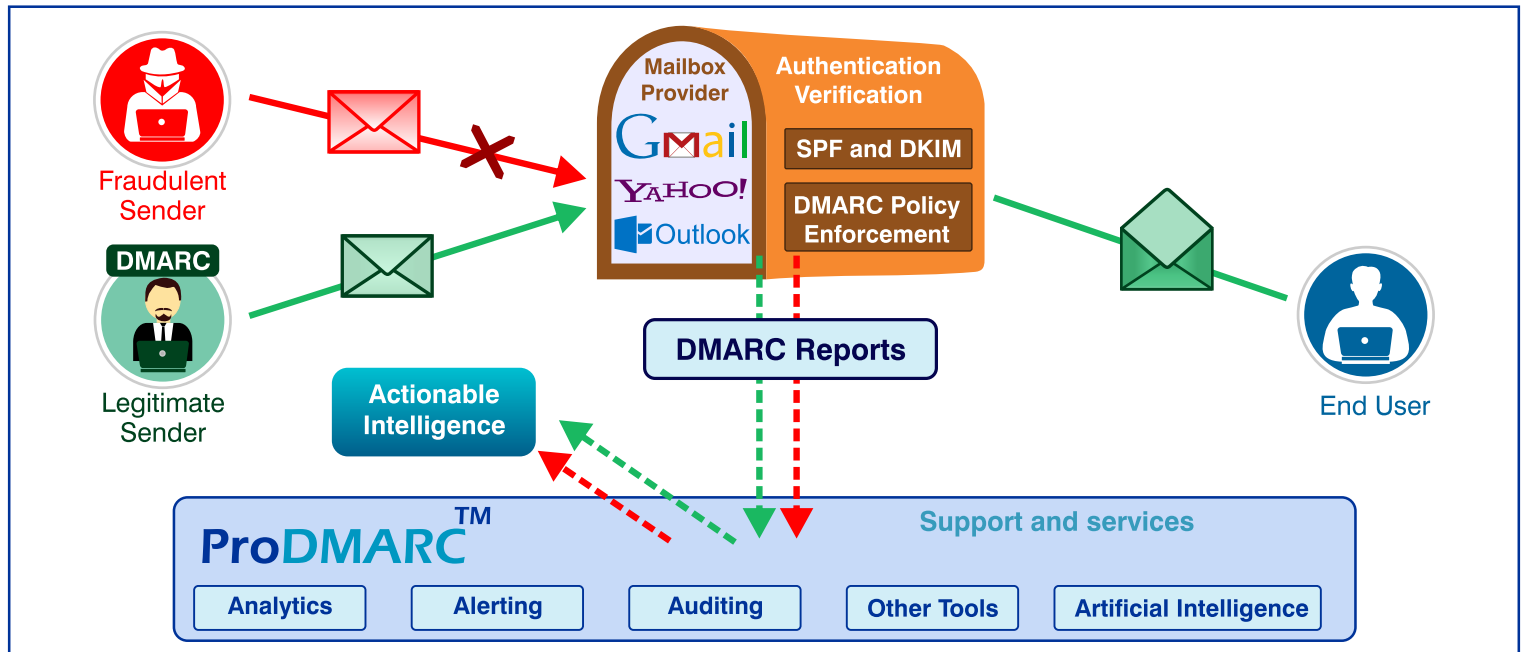

Enforce DMARC policy to reject  
unauthenticated email

### STEP3

Protect your end users  
and customers

## ProDMARC Return On Security Investment

The ROSI on the investment has been outstanding for customers of ProDMARC.
